

TECHNICAL DATA SHEET FLORPROTEC BREATHA-BORD

Florprotec® Breatha-Bord is a unique breathable correx style board available in two grades up to 3mm heavy duty. This material offers excellent impact resistance whilst allowing surfaces beneath to breathe. Ideal for use over uncured subfloors and screeds or finished uncured floors, uncured adhesives on carpet or vinyls, timber etc.

BASE MATERIAL & FEATURES

Florprotec® Breatha-Bord is a plastic material manufactured from extruded recycled polypropylene – flame retardant corrugated heavy duty breathable protection sheet. The ground breaking material is specifically designed to protect uncured floors from impact damage, whilst allowing the finish to breathe and cure naturally. The correx style corrugated plastic sheets are constructed from fluted twin-wall sheets to create a rigid, compression and impact resistant board which is lightweight and extremely strong. Breatha-Bord also offers a slip-resistant upper surface for excellent site safety.

APPLICATIONS

Temporary protection of timber, resin, screed, painted and uncured floors. Superb impact resistance and completely waterproof for indoor and outdoor applications. Florprotec® Breatha-Bord flame retardant corrugated plastic sheets prevent damage to floors and smooth surfaces during major construction, interior fit-out and refurbishment projects.

ADVANTAGES

- Flame retardant
- The ultimate breathable impact protection sheet
- Proven protection properties on major construction projects
- Slip-resistant upper surface for health and safety
- Supplied in sheet form for quick and easy installation and removal
- Simple, effective way to prevent damage to surfaces
- Lightweight, waterproof and extremely strong
- Suitable for scaffold deck applications
- Tough, durable and impact resistant
- Easy to cut, crease and bend
- Manufactured from recycled materials and completely recyclable
